Let's derive the van't Hoff Equation!

$$\Delta_r G^\circ = -RT \ln K \rightarrow -RT \ln K = \Delta_r H^\circ - T \Delta_r S^\circ$$

$$\Delta_r G^\circ = \Delta_r H^\circ - T \Delta_r S^\circ$$

$$\frac{d \ln K}{dT} = \frac{\Delta_r H^\circ}{RT^2}$$

$$\ln \left(\frac{K_2}{K_1} \right) = \frac{-\Delta_r H^\circ}{R} \left(\frac{1}{T_2} - \frac{1}{T_1} \right)$$

*'Tis late; the astronomer in his lonely height,
Exploring all the dark, descries afar
Orbs that like distant isles of splendor are,*

*He summons one dishevelled wandering star,
Return ten centuries hence on such a night.*

*The star will come. It dare not by one hour
Cheat science, or falsify her calculation;
Men will have passed, but watchful in the tower
Man shall remain in sleepless contemplation;
And should all men have perished there in turn,
Truth in their staid would watch that star's return.*

Bentinck noted "the dreadful responsibility hanging over his head in this world and the next, if... he was to consent to the continuance of this practice (sati) one moment longer." After consultation with the army and officials, Bentinck passed the Bengal Sati Regulation, 1829. This was challenged by the Dharma Sabha which appealed in the Privy Council, however the ban on Sati was upheld
